FEATURES

MODULAR CONSTRUCTION (EX / SB)

Modular construction allows you to arrange cabinets as you require, floor standing, attached to your walls, or both, you decide.
A system of specialist furniture that combines elegance, technical performance and perfection.

CABLE MANAGEMENT (EX)

Cables are an essential part of your system, but you don't want to see them. Multiple and discrete horizontal and vertical cable channels make for easy access for cabling through shelves and cabinets whilst keeping them out of sight within the cabinet.

ROTATING MOUNT (EX)

Brushed anodised aluminium profile is used for TV mounting and provides rotating and an integrated cable management system.

ACID ETCHED GLASS / BACK PAINTED (EX/SB)

Acid-etched glass is annealed glass treated with acid to permanently change its appearance, making it smoother than sandblasted glass.
We strategically color the reverse side of a piece of glass using advanced equipment renowned for precision, spray painting unit and tempering oven, to ensure the finished product is evenly covered. By coupling the beauty of back-painted glass with its practicality, you'll have a winning combination for endless applications.

PORCELAIN & GLASS LAMINATION

Porcelain be can used as the skin for surfaces and structures, designed to multiply intended uses and applications. (Tabletops, sideboard body or front, coffee tables etc.)

Laminated porcelain & glass is a type of safety material that is made of two or more panels of ajoined together by a layer of plastic (EVA). You can think of this joining as creating a glass & porcelain sandwich. It is safer, if broken, glass or porcelain fragments remain in place rather than breaking into dangerous shards.

Using this new concept that combines light weight and technical performance, it is now possible to create genuine products or installations with the added benefits that come with ceramic technology. The very nature of the material also lets designers apply each of these possibilities in indoor and outdoor environments to develop smooth, curved and even backlit surfaces.

ACOUSTIC FABRIC DOOR (EX / SB)

Amplifier, media players and game consoles can all be stored behind flaps which are covered with acoustic fabric door or perforated door. Designed to ensure adequate ventilation so your devices don't overheat. A sound bar, loudspeakers and subwoofers can be placed and operated, hidden from view, without affecting performance.
